

Later, the weather turns stormy. The cavers sit inside their tent and talk about what they will see in the cave tomorrow. They hope to see some animals that glow in the dark!

The cavers watch as the moon tries to shine through the clouds. Suddenly, lightning flashes across the sky.

Bright light

Stars light up the night sky. The moon appears bright in the night sky, too. But the moon has no light of its own. Moonlight is light **reflecting** from the sun.

A lightning flash between a cloud and the ground can be as long as 14 kilometres!
