

## Short multiplication

1.

$$\begin{array}{r} 215 \\ \times \quad 4 \\ \hline \\ \hline \end{array}$$

2.

$$\begin{array}{r} 217 \\ \times \quad 3 \\ \hline \\ \hline \end{array}$$

3.

$$\begin{array}{r} 119 \\ \times \quad 5 \\ \hline \\ \hline \end{array}$$

4.

$$\begin{array}{r} 272 \\ \times \quad 3 \\ \hline \\ \hline \end{array}$$

5.

$$\begin{array}{r} 141 \\ \times \quad 7 \\ \hline \\ \hline \end{array}$$

6.

$$\begin{array}{r} 151 \\ \times \quad 6 \\ \hline \\ \hline \end{array}$$

7.

$$\begin{array}{r} 247 \\ \times \quad 4 \\ \hline \\ \hline \end{array}$$

8.

$$\begin{array}{r} 137 \\ \times \quad 6 \\ \hline \\ \hline \end{array}$$

9.

$$\begin{array}{r} 119 \\ \times \quad 8 \\ \hline \\ \hline \end{array}$$

10.

$$\begin{array}{r} 712 \\ \times \quad 5 \\ \hline \\ \hline \end{array}$$

11.

$$\begin{array}{r} 341 \\ \times \quad 7 \\ \hline \\ \hline \end{array}$$

12.

$$\begin{array}{r} 706 \\ \times \quad 8 \\ \hline \\ \hline \end{array}$$

I can multiply a three-digit number by a one-digit number using formal written layout.
