

Noun sorts

Is this a noun?

If you can imagine saying 'a', 'an' or 'the' before a word – then it is a noun.

<p>A noun is a word for a thing.</p> 	<p>It could be a thing you see.</p> 
<p>It could be a thing you feel.</p> 	<p>It could be an abstract thing you just know. For example: An understanding</p>

- Sort these words into **two** separate lists:
 - words we could use as nouns
 - words we don't use as nouns.
