Cell biology

REVIEW

- 1 Stem cells are used in research to make organs for transplant.
 - a What are stem cells?
 - b Describe where stem cells can be found.
 - c Discuss the advantages and disadvantages of using stem cells to make organs for transplant.
- 2 A section of Visking tubing containing a concentrated sugar solution is placed into a beaker of distilled water, in order to observe osmosis.
 - a Define osmosis.
 - b Explain what will happen to the Visking tubing.
 - c Why is Visking tubing a good model of a cell?
 - d Explain what would happen to an animal cell if it were placed into distilled water.
