

# Urban issues and challenges

## Global patterns of urban change

Study **Figure 1**, a graph showing world population growth from 1800 to 2050 (predicted).

**Figure 1**

Remember, answering multiple-choice questions should be quick. Aim to spend no more than 1 minute of exam time to work out the answer to this type of question.

- ① Using **Figure 1**, which **two** of the following statements about the pattern of population growth are true?

Shade **two** circles only. (2 marks, ★)

- A The population of the world has decreased over time.
- B The population of the world experienced a rapid growth from 1960.
- C Global population is predicted to rise to 9 billion by 2050.
- D The peak population growth was reached in 2000.
- E The population of the world experienced a rapid growth between 1800 and 1950.

- ② Describe **two** processes that cause a population to increase in size. (4 marks, ★★)

**Process 1:** .....
