

Revision Guide contents

Topic 1

ATOMIC STRUCTURE AND THE PERIODIC TABLE

Atoms, elements and compounds	10
Mixtures and compounds	11
Pure substances and formulations	14
Chromatography	16
Scientific models of the atom	18
Atomic structure	19
Isotopes and relative atomic mass	21
The development of the periodic table and the noble gases	23
Electronic structure and the periodic table	25
Metals and non-metals	27
Group 1 – the alkali metals	28
Group 7 – the halogens	30
Displacement reactions in group 7	32
The transition metals	34
Review It!	35

Topic 2

BONDING, STRUCTURE AND THE PROPERTIES OF MATTER

Bonding and structure	36
Ions and ionic bonding	38
The structure and properties of ionic compounds	40
Covalent bonds and simple molecules	42
Diamond, graphite and graphene	44
Fullerenes and polymers	46
Giant metallic structures and alloys	47
Nanoparticles	49
Review It!	50

Topic 3

QUANTITATIVE CHEMISTRY

Conservation of mass and balancing equations	51
Relative formula masses	53
The mole	55
Reacting masses and using moles to balance equations	57
Limiting reactant	59
Concentrations in solutions	60
Moles in solution	62
Moles and gas volumes	64
Percentage yield and atom economy	66
Review It!	67

Topic 4

CHEMICAL CHANGES

Metal oxides and the reactivity series	68
Extraction of metals and reduction	70
The extraction of iron in the blast furnace (EDUQAS only)	72
The reactions of acids	74
The preparation of a soluble salt	76
Oxidation and reduction in terms of electrons	78
The pH scale and neutralisation	79
Strong and weak acids	80
The basics of electrolysis and the electrolysis of molten ionic compounds	81
The electrolysis of copper(II) sulfate and electroplating	83
The electrolysis of aqueous solutions	85
The extraction of metals using electrolysis	87
Investigation of the electrolysis of aqueous solutions	88
Determining reacting volumes by titration	90
Review It!	92

ENERGY CHANGES

Exothermic and endothermic reactions	93
Practical: Investigation into the variables that affect temperature changes in chemical reactions	94
Reaction profiles	96
The energy changes of reactions	97
Chemical cells and fuel cells	99
Review It!	101

RATES OF REACTION AND EQUILIBRIUM

Ways to follow a chemical reaction	102
Calculating the rate of reaction	105
The effect of concentration on reaction rate and the effect of pressure on the rate of gaseous reactions	107
Rates of reaction - the effect of surface area	108
The effects of changing the temperature and adding a catalyst	109
An investigation into how changing different factors affects the rate of reaction	111
Reversible reactions	113
The effect of changing conditions on equilibrium	115
Review It!	117

ORGANIC CHEMISTRY

Carbon compounds, hydrocarbons and alkanes	118
Crude oil, fractionation and petrochemicals	120
The structural formulae and reactions of alkenes	122
Cracking and alkenes	124
Alcohols	126
Carboxylic acids	128
Addition polymerisation	130
Condensation polymerisation	132
Amino acids and DNA	134
Review It!	135

CHEMICAL ANALYSIS

Testing for gases	136
Identifying metal ions using flame tests and flame emission spectroscopy	137
Identifying metal ions using sodium hydroxide solution	139
Testing for negative ions (anions) in salts	141
Practical: Identifying ions in an ionic compound	143
Review It!	145

CHEMISTRY OF THE ATMOSPHERE

The composition and evolution of the Earth's atmosphere	146
Climate change	148
Reducing the carbon footprint	150
Atmospheric pollutants	152
Review It!	154

USING RESOURCES

Finite and renewable resources, sustainable development	155
Life cycle assessments (LCAs)	157
Alternative methods of copper extraction	159
Making potable water and waste water treatment	161
Ways of reducing the use of resources	163
Rusting	164
Alloys as useful materials	166
Ceramics, polymers and composites	168
The Haber process	170
Production and uses of NPK fertilisers	172
Analysis and purification of a water sample	173
Review It!	175
Glossary/Index for the Revision Guide	176
Answers for the Revision Guide	180

Topic 5

Topic 6

Topic 7

Topic 8

Topic 9

Topic 10

Exam Practice contents

Topic 1

ATOMIC STRUCTURE AND THE PERIODIC TABLE

Atoms, elements and compounds	184
Mixtures and compounds	185
Pure substances and formulations	186
Chromatography	188
Scientific models of the atom	189
Atomic structure, isotopes and relative atomic mass	190
The development of the periodic table and the noble gases	191
Electronic structure	192
Metals and non-metals	193
Group 1 – the alkali metals	194
Group 7 – the halogens	195
The transition metals	196

Topic 2

BONDING, STRUCTURE AND THE PROPERTIES OF MATTER

Bonding and structure	197
Ions and ionic bonding	198
The structure and properties of ionic compounds	199
Covalent bonds and simple molecules	200
Diamond, graphite and graphene	201
Fullerenes and polymers	202
Giant metallic structures and alloys	203
Nanoparticles	204

Topic 3

QUANTITATIVE CHEMISTRY

Conservation of mass and balancing equations	205
Relative formula masses	207
The mole and reacting masses	208
Limiting reactants	210
Concentrations in solutions	212
Moles in solution	213
Moles and gas volumes	214
Percentage yield and atom economy	215

Topic 4

CHEMICAL CHANGES

Metal oxides and the reactivity series	216
Extraction of metals and reduction	217
The blast furnace	218
The reactions of acids	219
The preparation of soluble salts	220
Oxidation and reduction in terms of electrons	221
pH scale and neutralisation	222
Strong and weak acids	223
Electrolysis	224
Electrolysis of copper(II) sulfate and electroplating	225
The electrolysis of aqueous solutions	226
The extraction of metals using electrolysis	227
Practical investigation into the electrolysis of aqueous solutions	228
Titrations	229

Topic 5

ENERGY CHANGES

Exothermic and endothermic reactions	230
Practical investigation into the variables that affect temperature changes in chemical reactions	231
Reaction profiles	232
The energy changes of reactions	233
Chemical cells and fuel cells	234

RATES OF REACTION AND EQUILIBRIUM

Ways to follow a chemical reaction	235
Calculating the rate of reaction	236
The effect of concentration on reaction rate and the effect of pressure on the rate of gaseous reactions	237
Rates of reaction – the effect of surface area	239
The effects of changing the temperature and adding a catalyst	240
An investigation into how changing the concentration affects the rate of reaction	241
Reversible reactions	243
The effect of changing conditions on equilibrium	244

ORGANIC CHEMISTRY

Alkanes	245
Fractional distillation	246
Cracking and alkenes	247
Alcohols	248
Carboxylic acids	249
Addition polymerisation	250
Condensation polymerisation	251
Amino acids and DNA	252

CHEMICAL ANALYSIS

Testing for gases	253
Identifying metal ions using flame tests, flame emission spectroscopy and sodium hydroxide	254
Testing for negative ions (anions) in salts	255
Identifying ions in an ionic compound	256

CHEMISTRY OF THE ATMOSPHERE

The composition and evolution of the Earth's atmosphere	257
Climate change	258
The carbon footprint and its reduction	259
Atmospheric pollutants	260

USING RESOURCES

Finite and renewable resources, sustainable development	261
Life cycle assessments (LCAs)	262
Alternative methods of copper extraction	263
Making potable water and waste water treatment	264
Ways of reducing the use of resources	265
Rusting	266
Alloys as useful materials	267
Ceramics, polymers and composites	268
The Haber process	269
Production and uses of NPK fertilisers	270

PAPER 1
