

**NAIL IT!**

If you are sitting the AQA exam you will be given statements that are true and statements that are false in Question 1. You must read the text carefully and only mark the number of boxes you are asked to.

WORK IT!

Here is an example AQA Question 1. A student has chosen one statement that is true.

Read again **Text 1** from **lines 1 to 22**.

Choose **four** statements below which are TRUE.

- Shade the boxes of the statements that you think are true.
- Choose a maximum of four statements.

Statement A is true. Here are the words from Text 1 that prove the statement: '... that's not the end of the story'. You have to interpret a colloquial expression to realise that you are being told that there is more to shelter than just tents.

DO IT!

Find the remaining three true statements and shade the box next to it. Underline the words in **Text 1** which provide the best evidence for the statement.
