## 5: Multiplication and division

**I.** Kim is solving this word problem.

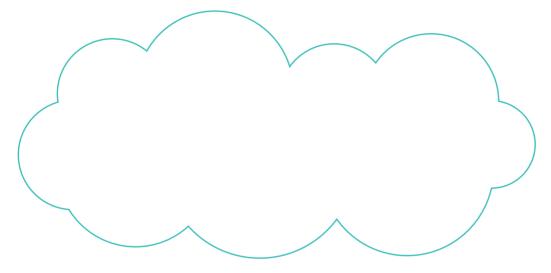

There are 28 days in February.

David earns £714 in February.

How much is this on average each day?

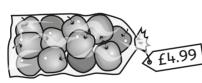

Kim says the answer is 25 r14.

Explain why this is not the correct answer.

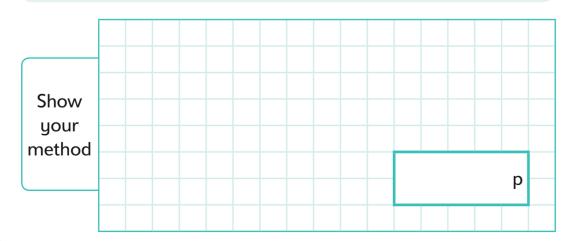

2. A bunch of 8 bananas costs £2.56.

A bag of 12 apples costs £4.99.

About how much more does one apple cost than one banana?
