

MYTH ATLAS

by Thiago de Moraes

Here are some traditional (and slightly less traditional) suggestions for your monsters' heads:

A bull's head will make a Minotaur.

Reptile heads always make scary monsters.

A falcon head might make a wise monster.

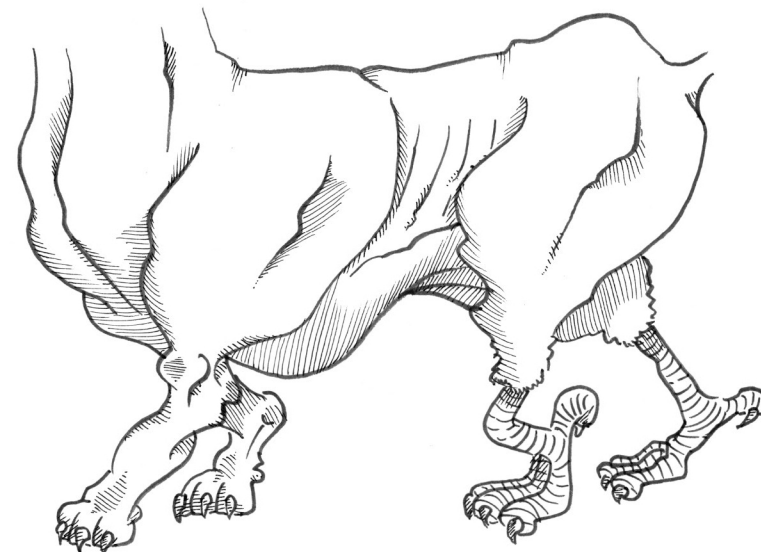

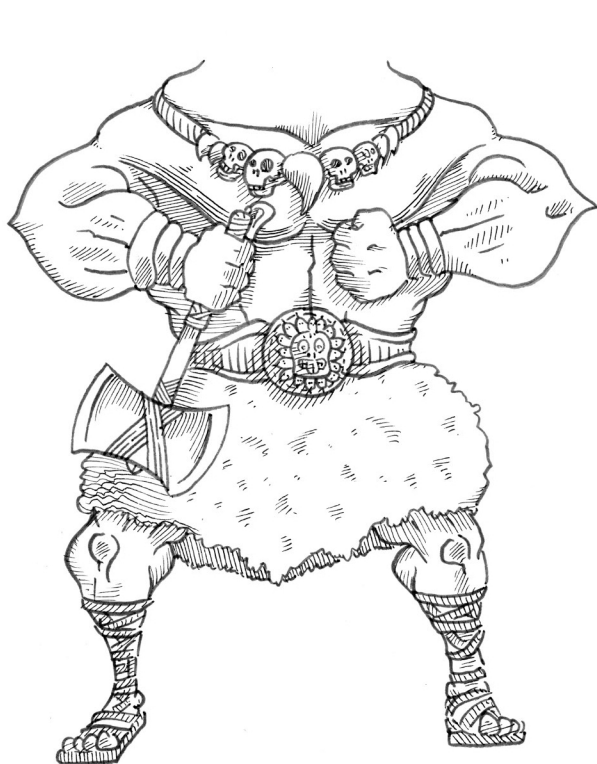

A tiger-headed monster is even scarier than the real thing.

Fish heads are less popular, but still very creepy.

You can't go wrong with a tapir head.

Create your own mythological monster

It's easier than it seems! Most mythological creatures are regular people or animals with some unusual bits. Draw heads on the images above and come up with a scary-sounding name.
